

ShipRx™

Offer patient-prescription shipping and employee-payroll deduction.

ShipRx is QS/1®'s pharmacy management and shipping solution. A combination of our NRx® Pharmacy Management, Point-of-Sale (POS) system and shipping interface that enables pharmacies to expand their capabilities to offer customers the convenience of prescription shipment and delivery.

Customize Customer Accounts and Shipments

ShipRx stores multiple addresses and allows you to set priorities, even pausing deliveries while patients are away from home, helping to ensure prescriptions arrive at the correct time and location. This can be a valuable tool that can help improve patient medication adherence and health outcomes.

Manage Multiple Payment Methods

The system manages multiple payment methods, including credit and debit cards, checks, money orders, charge accounts, cash and payroll deductions. Flexible Spending Account (FSA) cards are automatically identified and transactions can be processed in a secure PCI-compliant environment. Utilize patient and head-of-household accounts and store multiple credit cards for each address. Set default cards for an account or patient and designate limits and priorities among the cards. Use multiple payment methods for a single transaction and store account credit amounts to use before other payment methods.

Shipping Interface

ShipRx includes interfaces to FedEx, UPS, Pitney Bowes, Stamps (USPS) and Endicia, which eliminate rekeying patient demographic information and allow you to store the carrier-issued tracking number, shipping vendor and shipping priority, such as next day air, two day air, ground, etc.

Employee Pharmacy with Payroll Deduction

ShipRx is the perfect solution for employee pharmacies that require payroll deduction. It monitors payroll balances and automatically charges accordingly. If the charge exceeds the balance available, it records the allowed deduction and charges the remaining total to the credit card on file.

- Manages credit, debit and FSA cards, checks, money orders, charge accounts, cash and payroll deductions
- Pre-authorizes credit cards for payment
- Uses end-to-end encryption to safely transmit credit and debit card data
- Complies with FSA card federal mandates
- Securely stores multiple credit cards for each patient or household, utilizing tokenization to safeguard data
- Handles multiple addresses for patients
- Bills charge automatically upon shipment
- Manages payment by payroll deduction
- Handles individual and batch prescriptions
- Groups patients by household
- Prints an invoice/delivery ticket
- Uses Address Verification System (AVS) to verify card information for recurring billing
- Enables various levels of security access for each employee

Address Management

- Handles multiple addresses
- Enables prioritization of addresses
- Allows start and stop dates for travel and seasonal residences
- Identifies addresses for refrigeration delivery
- Alerts if refrigerated item is being shipped to a post office box
- Accounts for specialty drugs that may be shipped to physician
- Provides ability to add notes to records as needed

Credit Card Control

- Store multiple credit cards for each address
- Provides secure PCI-compliant environment
- Automatically identifies FSA cards
- Permits assigning charge limits for each card
- Allows designated priority for use

Payroll Deduction

- Stores up to 20 pay schedules
- Allows default charge limits for each employee/patient
- Automatically charges credit card for balance of transaction when charge exceeds payroll deduction

ShipRx Includes

- NRx® Pharmacy Management System
- QS/1 Point-of-Sale software with PaySentry®
- QS/1's Shipping Interface

ShipRx requires a POS register or a separate PC for PCI-compliance.
